##### 2. Reason

The Company positions the return of profits to shareholders as one of its key management policies. Based on consideration of changes in the mid-term management environment and the Group business strategy, our fundamental policy is to actively return profits through dividends while also enhancing our financial structure.

The 5th Mid-Term Management Plan (February 2015 to January 2017) establishes the target of an year-on year increase in dividends for each business period to a consolidated profit return rate of around 45% to 50%.

Based on the policy discussed above and considering performance for the year ended January 31, 2015, our Company is increasing the dividend per share to 60 yen, an 8 yen increase from the most recent dividend forecast.

As a result of this revision, the annual dividend per share for the year ended January 31, 2015 is 105 yen, an increase of 17 yen compared to the previous year.
