

Environmental Information Verification Report

To: Pigeon Corporation

1. Objective and Scope

Japan Quality Assurance Organization (hereafter “JQA”) was engaged by Pigeon Corporation (hereafter “the Company”) to provide an independent verification on “Pigeon Group GHG Calculation Report” (hereafter “the Report”). The content of our verification was to express our conclusion, based on our verification procedures, on whether the statement of information regarding FY2025* GHG emissions and energy consumption in the Report was correctly measured and calculated, in accordance with the “Pigeon Group Scope1 and 2 GHG emissions Calculation Manual (version 2.1)” (hereafter “the Rule”). The purpose of the verification is to evaluate the Report objectively and to enhance the credibility of calculation for GHG emissions and energy consumption in the Report.

*The fiscal year of the Company ended on December 31, 2025.

2. Procedures Performed

JQA conducted verification in accordance with “ISO 14064-3”. The scope of this verification assignment covers the GHG emissions (CO₂, CH₄, N₂O, HFCs, PFCs, SF₆ and NF₃ emissions) from Scope 1 & 2 and energy consumption. The verification was conducted to a limited level of assurance and quantitative materiality was set at 5 percent of the total emissions in the Report. The organizational boundaries of this verification cover 42 domestic and overseas sites, operated by the Company and its group companies.

Our verification procedures included:

- Confirming the integrated functions and the Rule prior to the on-site assessment.
- Holding on-site verification at three sampling sites: Pigeon Central Research Laboratory, Pigeon Manufacturing Ibaraki Corporation and Pigeon Industries (Changzhou) Co., Ltd., selected by the Company.
- On-site assessment to check the report boundaries, GHG emission sources, Monitoring points, Monitoring and Calculation system and its controls.
- Cross-checking the GHG emissions data and energy consumption against evidence for all sampling sites.

3. Conclusion

Based on the procedures described above, nothing has come to our attention that caused us to believe that the statement of the information regarding FY2025 GHG emissions and energy consumption in the Report is not materially correct or has not been prepared in accordance with the Rule.

4. Consideration

The Company was responsible for preparing the Report, and JQA’s responsibility was to conduct verification of GHG emissions and energy consumption in the Report only. There is no conflict of interest between the Company and JQA.
